

Links – Intro to Accessible PDF

There are three ways in which links are indicated within a document. Using the full URL, using an abbreviated URL, and embedding the link the text of the document (preferred).

Each approach presents unique challenges in making a PDF accessible to the screen reader user.

Embedding the link in the text of the document is the best approach as it provides the most readable and understandable form of the link. The following sentences demonstrate three ways to add a hyperlink to a document.

Embedded Hyperlink

Check out our [Adobe accessibility website](http://www.adobe.com/accessibility) for more information about accessibility at Adobe.

Shortened URL

For more information on accessibility at Adobe click on the link, www.adobe.com/accessibility.

Full URL

Go to <http://www.adobe.com/accessibility> for more information Adobe accessibility.

A correctly tagged link has the <Link> tag, text associated with the link, and a Link – OBJR tag (the order of the last two is irrelevant).
