Accessibility Studies Programs

15-credit Certificate

20-credit Minor

A certificate or minor in Accessibility Studies demonstrates competence in recognizing where, when, and how to include people with varying degrees of ability. Because our laws guarantee access to activities of independent living in all environments - work, home, school, shopping, medical, leisure, and virtual – this program adds value to all careers.

The four core courses constitute the 15-credit certificate. An undergraduate minor is available by adding 5 more credits. Take the core courses in any order.

- ASP 305 Accessibility and User Experience (4 cr) is offered every quarter. No prerequisites.
- ASP 325 Universal Design (4 cr) is offered Summer and Winter. No prerequisites.
- ASP 435 Accessible Information Design (5 cr) is offered Summer and Spring. Prerequisites: ENG 101-102.

Once those are underway, you can sign up for ASP 485 Accessibility Capstone (2-3 cr) Prerequisites: ASP 305, 325, and 435.

Just add 5 credits of electives to complete the 20-credit minor. Elective credits can often be arranged as dual credit with a class in your major.

Approved electives can include psychology, sociology, computer science, communication, graphic design, assistive technology, law, business, and many other topics because accessibility is a topic of universal interest.

We can also arrange an ASP 490 Internship.
