

# Introducing an ASR designed specifically for you, Captivate™

Most automatic speech recognition solutions fall short on meeting unique needs. Verbit's researchers, developers and linguists have since launched a revolutionary technology, Captivate™, to fill this gap. There's now a better way to receive accurate captions and transcripts automatically. We can tailor Captivate™ precisely to your needs.

## The benefits of using Captivate™

- ✓ Leverage a customer-centric solution that works for your needs instead of generic one-size-fits-all ASRs
- ✓ Witness continuous improvement within and after each session
- ✓ See higher performance on names, niche subject matter, accents, background noise and more
- ✓ Partner with an expert team committed to providing you with the highest accuracy possible

## Intelligent customization sets Captivate™ apart

### Personalized precision

Dedicated models crafted and based on your valuable input.

### Bespoke term boosting

Boosted by proactive research, integrations into customer folders and a dictionary of terms important to you.

### Dynamic domain mastery

Trained continuously on industry domain specifics both pre-session and within sessions.

### Customer-centric specifics

Built to integrate easily into the platforms you're using and to appear in any format you need.

## Use cases include:

Live sports and events

Media programming and live streams

Virtual meetings

Conferences & events

Legal proceedings

Medical transcription needs

Earnings calls

Campuses and online learning environments

Museums and visitor centers

Interactive personal assistants

Call centers

Marketing and social videos

Join the league of customers who trust Verbit and unlock a new era of efficiency with Captivate™.
